Rgs/Res freight wagons

Introducing our new 2024 miniature model of the Rgs/Res railway flat car, originally manufactured in Burgas, Bulgaria. While the exact production date remains uncertain, the genesis of its design traces back to 1986, as per the original documents archived at MÁV.

The design intricacies include oval openings in the central longitudinal beams, a signature feature that sets it apart. Furthermore, the use of C-channels for the frame, as opposed to conventional rectangular tubes, underscores the innovative construction approach of the original. Thanks to the integrated container pins the car is adaptable for container transport.

Our miniature model, a testament to our commitment to detail and quality, comprises an impressive array of 132-152 parts, varying with each version. Each piece is designed to replicate the original wagon's characteristics, ensuring an authentic and detailed representation.

Moreover, the wagon's widespread usage across various countries and private railways is reflected in the diverse positioning of boards with inscriptions. We take great pride in our attention to this aspect, aiming to reproduce these variations with precision. As a result, each model boasts a unique character, mirroring the individuality seen in real life.

ALBERT MODELL

About us

The history of our company

Established in 2014, Albert-Modell has swiftly emerged as a known name in the world of model railway manufacturing. Our international presence, which commenced in 2017, marks a significant milestone in our journey. At Albert-Modell, our primary focus rests on producing exquisitely detailed models of Eastern European freight wagons, alongside an impressive range of diesel locomotives, but our range includes more and more models from countries like Germany and Switzerland.

Our philosophy is anchored in the belief that model-making is an art that demands precision, detail, and affordability. We strive to blend these elements, offering our clients high-quality, intricately designed models at a price that respects their passion and investment in this hobby.

Our products are crafted not merely as toys, but as collectibles, with a dedication to craftsmanship.

We pride ourselves on producing models in limited quantities, ensuring that each piece we create is not just a model but an elegant representation of the original. This approach underlines our commitment to quality over quantity, making our models sought-after items for collectors and enthusiasts who value exclusivity and authenticity.
